Art Unit: 2873

Information Disclosure Statement

The Examiner has considered the information disclosure statement filed on 6/11/06 and 11/1/06.

Drawings

The drawings are objected to because the drawings contain hand written text. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Application/Control Number: 10/583,173 Page 3

Art Unit: 2873

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: the specification is missing section headers, for example: "Detail Description of the Invention".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7,13,14,15/13,15/14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The angular range of 8 to 10 degrees is unclear. Angular range depends on factors, such as lens curvature/design, distance from eye and material of the lens. The claims fail to define if applicant means such limitations as the viewing range or width of regions from a central axis. Thus, the Examiner is unclear to applicant's intended meaning the claims are indefinite.

Claim 15 inherits its indefiniteness from claims 13 and 14 from which it depends.

The claims will be examined as best understood by the Examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-8,10,11,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bouteloup (IDS reference).

Regarding claim 4-6,8,10,11, see figure 1. The eyeglasses have three regions-red, clear and green filters for drivers-see also pages 2-3.

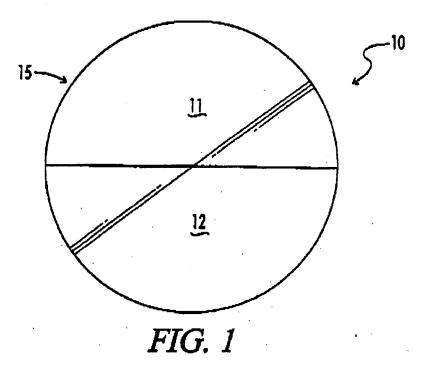

Art Unit: 2873

Claims 4-6,11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Heimberger (US 3,211,047-IDS reference).

Regarding claims 4-6,11-12, see figure 1 and col. 4.

Claims 4-8,11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kerns, Jr (US 2002/0005932).

Regarding claim 4, Kerns discloses a lens designed to provide two regions where one region of the lens differs from a view thereof through an adjacent region (see section 9-10,22-24).

Regarding claim 5,6, see figure 1.

Regarding claim 7-8, 11-14, see figure 1 and sections 7,9-10,22,26.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/583,173 Page 6

Art Unit: 2873

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kerns, Jr in view Griffith, Gregory (US 5,489,953).

Regarding claims 9 and 15, Kerns teaches the glasses are worn for sport activities such as golfing. The two zones of the lens have a boundary line. However, Kerns fails to specifically disclose a black band separates the zones/regions. Griffith teaches that a sight line is marked/painted or etched on the front of golf glass such to delineate two regions (see col. 3,lines 5-10). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include this feature since it is known in the art to produce a sight line to separate viewing regions and Griffith teaches the mark can be of many design fashion. In addition, it would have been further obvious to one of ordinary skill in the art at the time the invention was made to provide a black band so the user will clearly distinguish the regions in the lens surface.

Allowable Subject Matter

Claims 1-3 are allowed.

Conclusion

Art Unit: 2873

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alicia M. Harrington whose telephone number is 571 272 2330. The examiner can normally be reached on Monday - Friday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Mack can be reached on 571 272 2333. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
